COLLECTION OFFERS

and SUMMER PRICE LIST

Season 1926

The gratifying reception accorded my former lists of popular priced collections has induced me to add descriptions of the different varieties, that this list may be of greater assistance to my patrons in making their further selections.

The collections offered here will be found to be even more desirable than the earlier ones. Roots offered are carefully selected for extra strong growth and are larger than the standard commercial single toe division. All are correctly labeled and guaranteed true to name. Prices include delivery by Parcel Post.

"S" means standards or upright petals; "F" means falls or the drooping petals. Numbers in front of name are the American Iris Society rating. Names not rated are of recent introduction.

CASH WITH ORDER. Please write your name and address PLAINLY on order.

No substitution except on request, and money refunded immediately if order cannot be filled.

Summer delivery begins the last of June or first of July; fall delivery the last of August or first of September.
